CONCEPT NOTE

If goes without saying that the ancient Sanskrit Literature has a resplendant lone history of creative compositions enriched by the enormous contributions of the great personalities. But, much contrary to the popular belief and misconception, mediaeval and modern Sanskrit literary compositions have also been vibrantly sustaining the age-old tradition of creativity. The seminar, apart from making retrospective studies of the great ancient works. will peep into the mediaeval period to note as to how the authors and the authoresses have preserved the heritage against all odds, and also significantly will trace the trends, issues and challenges facing the contemporary Sanskrit writings of the modern Indian authors who have brought remarkable variations in both the modes and the contents of their creative Sanskrit writings without keeping to the beaten track.
